

*To prepare for the exam I reviewed the study guides that we went over in class, and while reviewing, I also had my textbook with me so that I could add additional notes to the slides with information that I thought would be important to know. For me, I learn best by writing things down.

*So what I did was, I reviewed the slides, and then I re-wrote key facts in the margins of the paper so that they would stand out, making it easier for me to learn. In addition, I read the chapters in the textbook to make sure that I covered any information that was not in the study guides. I hope this helps!
